ONE DEAL, START TO FINISH

Read left to right. Red dashed arrows are the points where an agent stops and asks the human.

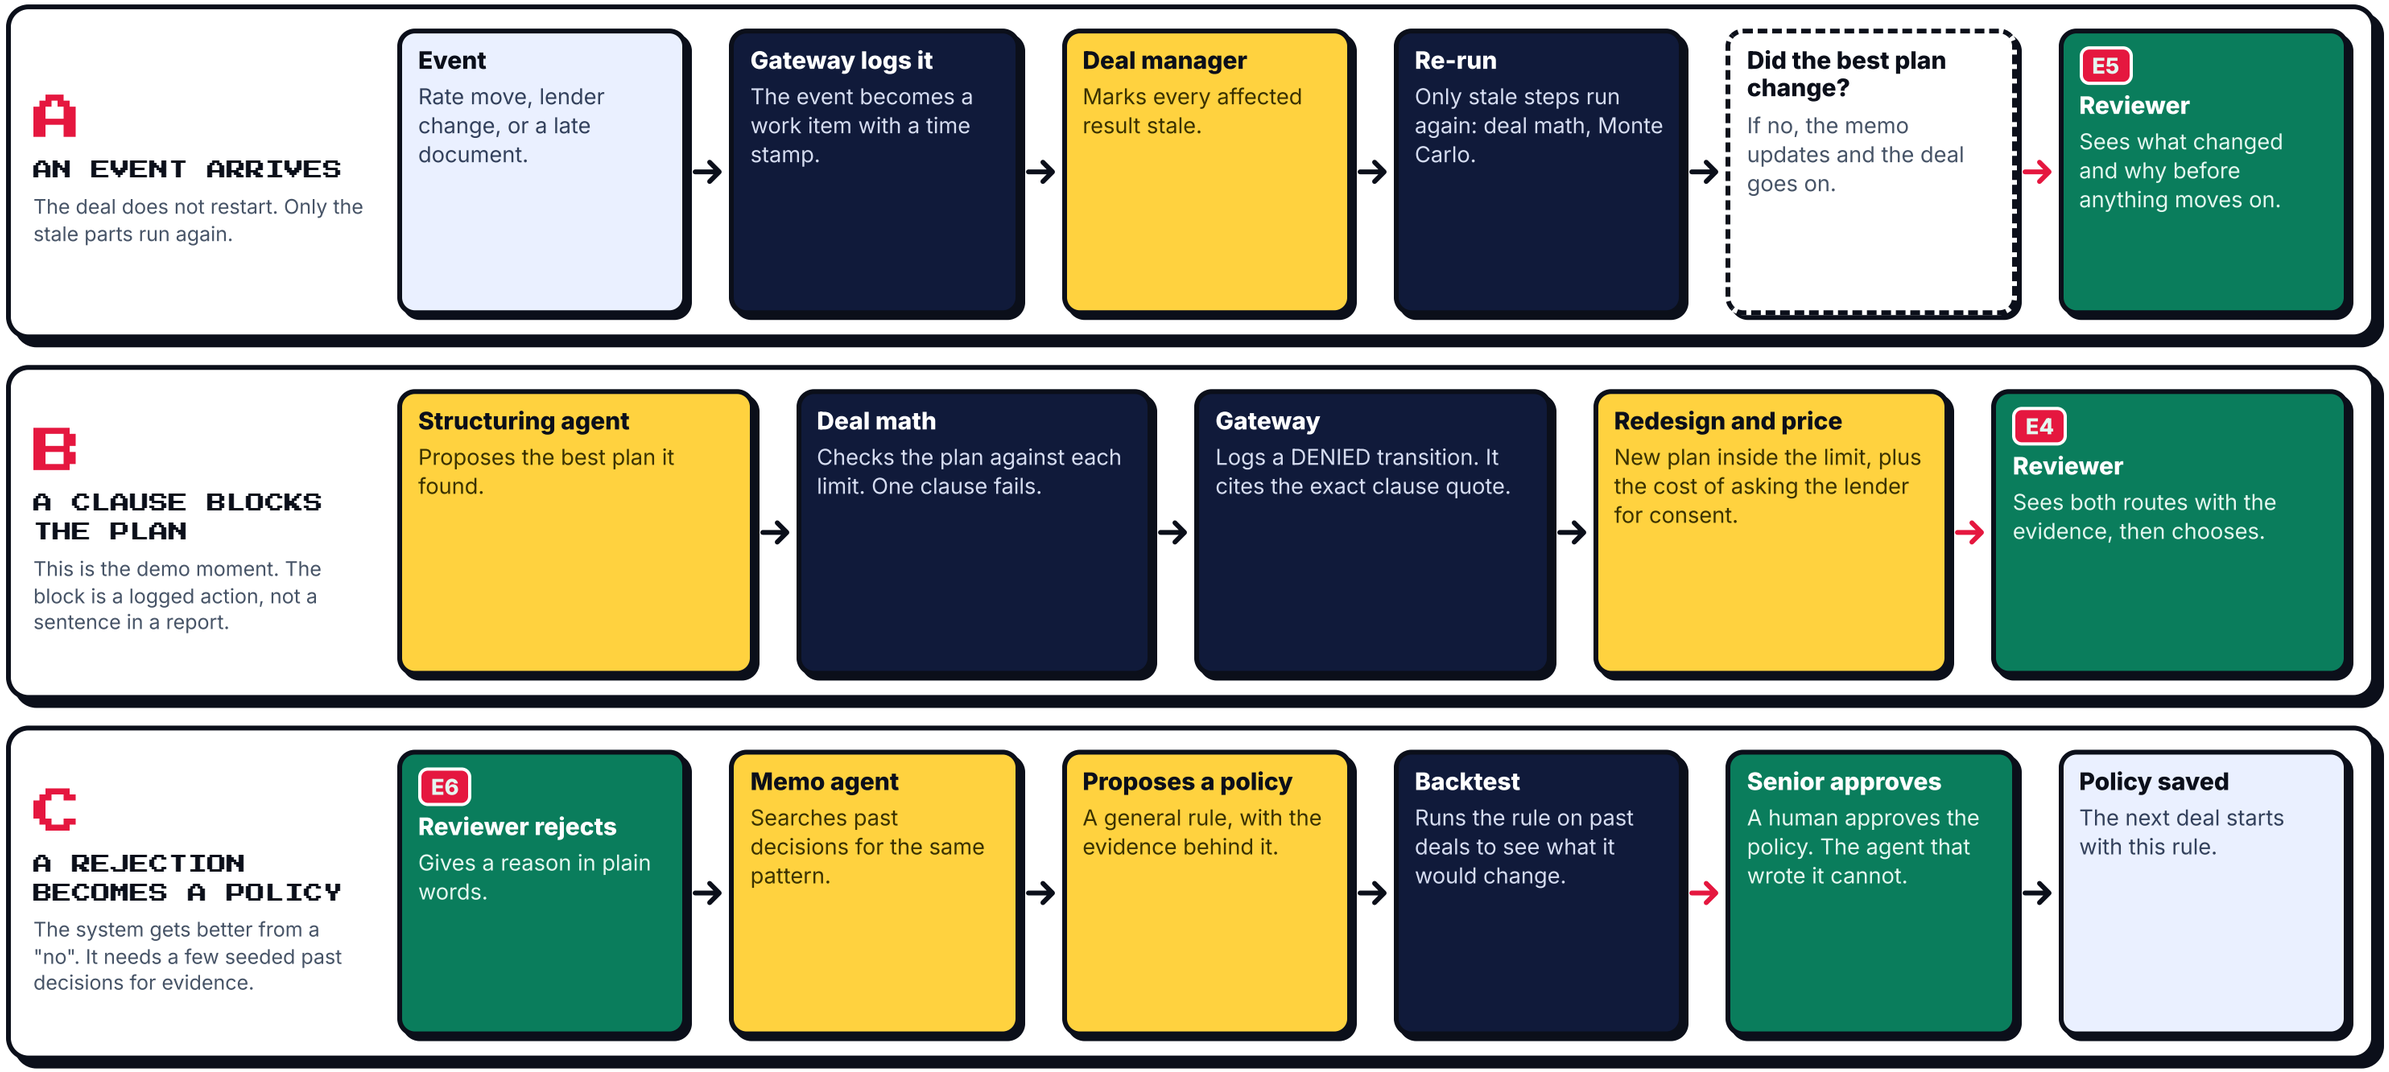

ANY TIME An event can arrive: a rate move, a lender change, or a late document. The deal manager marks the affected results **stale** and re-runs only those steps. If the best plan changes, **E5** asks the reviewer.

AI agent · Code (no AI) · Human reviewer · Escalation point (E1 to E6)

WHEN THINGS CHANGE

Three loops that run inside the deal: an event, a blocked plan, and a rejection
